

## Job Circular: Glorydale Merchant Service

### Position: Integration Test Analyst

Location: 18 Wintersells Road, Byfleet, Surrey, KT14 7LF

Glorydale Merchant Service is expanding its Technology & Payments Operations team and is looking for a highly skilled and motivated **Integration Test Analyst** to join our growing organisation. This role is essential to ensuring the successful integration of POS systems, payment platforms, and third-party APIs within our dynamic payment ecosystem.

### Position Overview

As an **Integration Test Analyst**, you will be responsible for planning, designing, and executing test strategies to ensure seamless communication between internal systems, POS devices, and external payment partners. You will work closely with developers, QA engineers, and product teams to deliver high-quality integration outcomes.

### Key Responsibilities

- Develop and execute integration test strategies, frameworks, and scripts for POS and payment system applications.
- Analyse system interfaces, data flows, and interdependencies across internal software, hardware, and external payment gateway APIs.
- Perform manual and automated test cases for functional, regression, and end-to-end testing.
- Log, track, and manage defects using test management tools.
- Validate transaction accuracy and data consistency across all integrated systems.
- Produce and maintain documentation including test plans, test data, and test reports.
- Support CI/CD pipelines by integrating automated test suites.
- Ensure compliance with PCI DSS, data protection standards, and relevant security protocols.
- Participate in release readiness reviews and contribute to post-deployment validation.

## Job Requirements

### Essential Skills & Experience

- Experience in integration testing, particularly in payment systems or POS environments.
- Strong understanding of API integrations, data mapping, and transaction workflows.
- Hands-on experience with test automation tools and scripting.
- Knowledge of software development lifecycles and CI/CD environments.
- Familiarity with PCI DSS and general data security principles.

### Desirable

- Experience working with third-party payment acquirers or gateway platforms.
- Knowledge of SQL/Data querying for validation.

## Employment Details

- **Type:** Permanent, full-time
- **Working Hours:** 37.5 hours per week
- **Days:** Monday to Friday
- **Salary:** Competitive (based on experience)
- **Holidays:** 28 days per year including public holidays
- **Location:** No weekend or night shifts required

## How to Apply

Interested candidates are invited to send their **CV** and a **cover letter** to:
